

STORMWATER SOLUTION SOURCE

an LB Water affiliated company

Stormwater & Environmental Solutions

Water Detention Systems

Water Storage Systems

Vault/Baffle Boxes

Onsite S3 Project Consulting

Stormwater Solution Source (S3), teaming with leading companies in the stormwater industry, is available to provide turnkey solutions to a wide range of mid-Atlantic stormwater challenges.

S3 relationships include ADS, Contech, Suntree Technologies, and Tensar International, among others.

Products and services address the best available technologies/best management practices for MS4 requirements, including:

- **Impervious to Permeable Surface Conversion**
- **Specialty Aggregates**
- **Inlet, Inline and End-of-Pipe Containment**
- **HDPE Pipe**
Dual & Single Wall
Fittings — Standard & Custom
- **Corrugated Metal Pipe**
- **Geotextiles**
Woven & Non-Woven
Geogrids
- **Inlet Basins**
Inline Drains
Custom Basins
Inlet Filters
- **Stormwater Retention & Detention Systems**
- **Water Quality Devices**
- **Biofiltration Systems**

SOLUTIONS FOR STORMWATER

Stormwater Impact

Awareness of stormwater runoff and its effects on the environment is growing and regulations to address this awareness are being implemented in many municipalities. S3 provides solutions to the demands for controlling the quantity and improving the quality of stormwater runoff.

We carefully consider the factors needed in stormwater management and propose practical stormwater and environmental solutions. We have aligned ourselves with the industry's top manufacturers, providing the products, knowledge and support for solutions to your stormwater needs.

Stormwater Systems

Retention Systems: Capture water runoff in a defined area where it can percolate into the ground

Detention Systems: Slow and temporarily control water runoff so it can be released over a period of time to prevent overflow

Subsurface Systems: Water intake is below grade, using chambers, piping systems and gravel to control water flow. These systems are underground and offer many advantages, such as increasing land use for green areas.

Retention - Detention - Subsurface Systems

Biofiltration Systems

Geotextile/Geogrid

Inline & Custom Drains

Corrugated

HDPE

Inlet Filters

Porous Concrete
